CLASH

ONLINE

INTEGRITY CAMERA GUIDELINES

During the Main Stage of Betcltic Clash Online, all players are required to share a webcam or phone video signal to ensure the highest possible level of integrity of the games. This document describes the correct way to share such a signal.

1. Video sharing platform

Participants must provide a signal through the official Discord server of the tournament. The link to the server is available at

<https://clashseries.eu/en>

2. Framing

The player must position the camera or phone so that the frame covers the entire setup of the player (monitor, desk, peripherals). The player's body/chair must not obstruct the monitor. The proposed framing can be found below:

3. Video sharing device

The player can use a webcam or a phone with the Discord app to share the video signal.

4. Aspect ratio

The aspect ratio of the video signal must be 16:9 (horizontal frame). Vertical framing is not allowed.

5. Penalties

Information on penalties for failing to provide video signal can be found in the official rulebook of the tournament.
